Bluefield | Solar Income Fund

INTRODUCTION

Bluefield Solar Income Fund Limited ("BSIF" or the "Company") is a sector specialist infrastructure fund focused on the acquisition and optimisation of UK based solar photovoltaic ("PV") energy assets.

The Company was listed on the LSE on 12 July 2013 and now has a market capitalisation of £309m as at 30 June 2016.

The Board comprises four experienced independent directors (the "Directors", see left), receiving arms-length investment advice from Bluefield Partners LLP ("Bluefield" or the "Investment Adviser", see page 4 for details).

FINANCIAL AND OPERATIONAL HIGHLIGHTS

As of 30 June 2016, the Company has 36 solar PV projects spread across England and Wales. Total portfolio capacity increased by 4.1 megawatts peak ("MWp") to a total c.401.6 MWp in the period.

During the period, the Company completed the acquisition of Burnaston, a 4.1 MWp plant connected into a Toyota car manufacturing plant located in Burnaston, Derby. The plant was commissioned in July 2011 and benefits from fully RPI-linked 25 year Feed-in Tariff ("FIT").

The second interim dividend of 1p per Ordinary Share ("POS") in respect of the financial year ("FY") ending 30 June 2016 was paid 20 May 2016.

The Company is on target to deliver a 7.07p POS dividend for the FY ending 30 June 2016 (7p POS target return in FY 2015, 7.25p POS delivered).

INVESTMENT OBJECTIVES

The Company seeks to provide shareholders with an attractive return, principally in the form of quarterly income distributions, by investing in a portfolio of large scale UK-based solar energy infrastructure assets.

COMPANY OUTLOOK

The Company and its Board have set a target to deliver long-term, stable dividends growing in-line with RPI.

The Directors believe that attractively priced acquisitions and strong contractual protections will allow the Company to achieve the target return of 7p POS annually, rising with RPI.

Subject to maintaining prudential level of reserves, the Directors intend to distribute cash generated in order to optimise shareholders' returns and that the Company will achieve its target returns without recourse to reinvestment of spare cash flows.

INVESTMENT POLICY AND STRATEGY SUMMARY

The Company invests in a diversified portfolio of solar PV energy assets, each located within the UK, with a focus on utility scale assets and portfolios on greenfield, industrial and/or commercial sites. The Company targets long life solar energy infrastructure investments, expected to generate stable renewable energy output over a 25 year asset life.

No single investment in a solar energy infrastructure asset (excluding any third party funding or debt financing in such asset) will represent, on acquisition, more than 25 per cent. of the prevailing net asset value ("NAV").

Total non-recourse financing within the portfolio will not exceed 50 per cent. of the prevailing gross asset value ("GAV"). Short term debt to facilitate the acquisition of investments (when taken together with the project finance noted above) will also be limited so as not to exceed 50 per cent. of GAV.

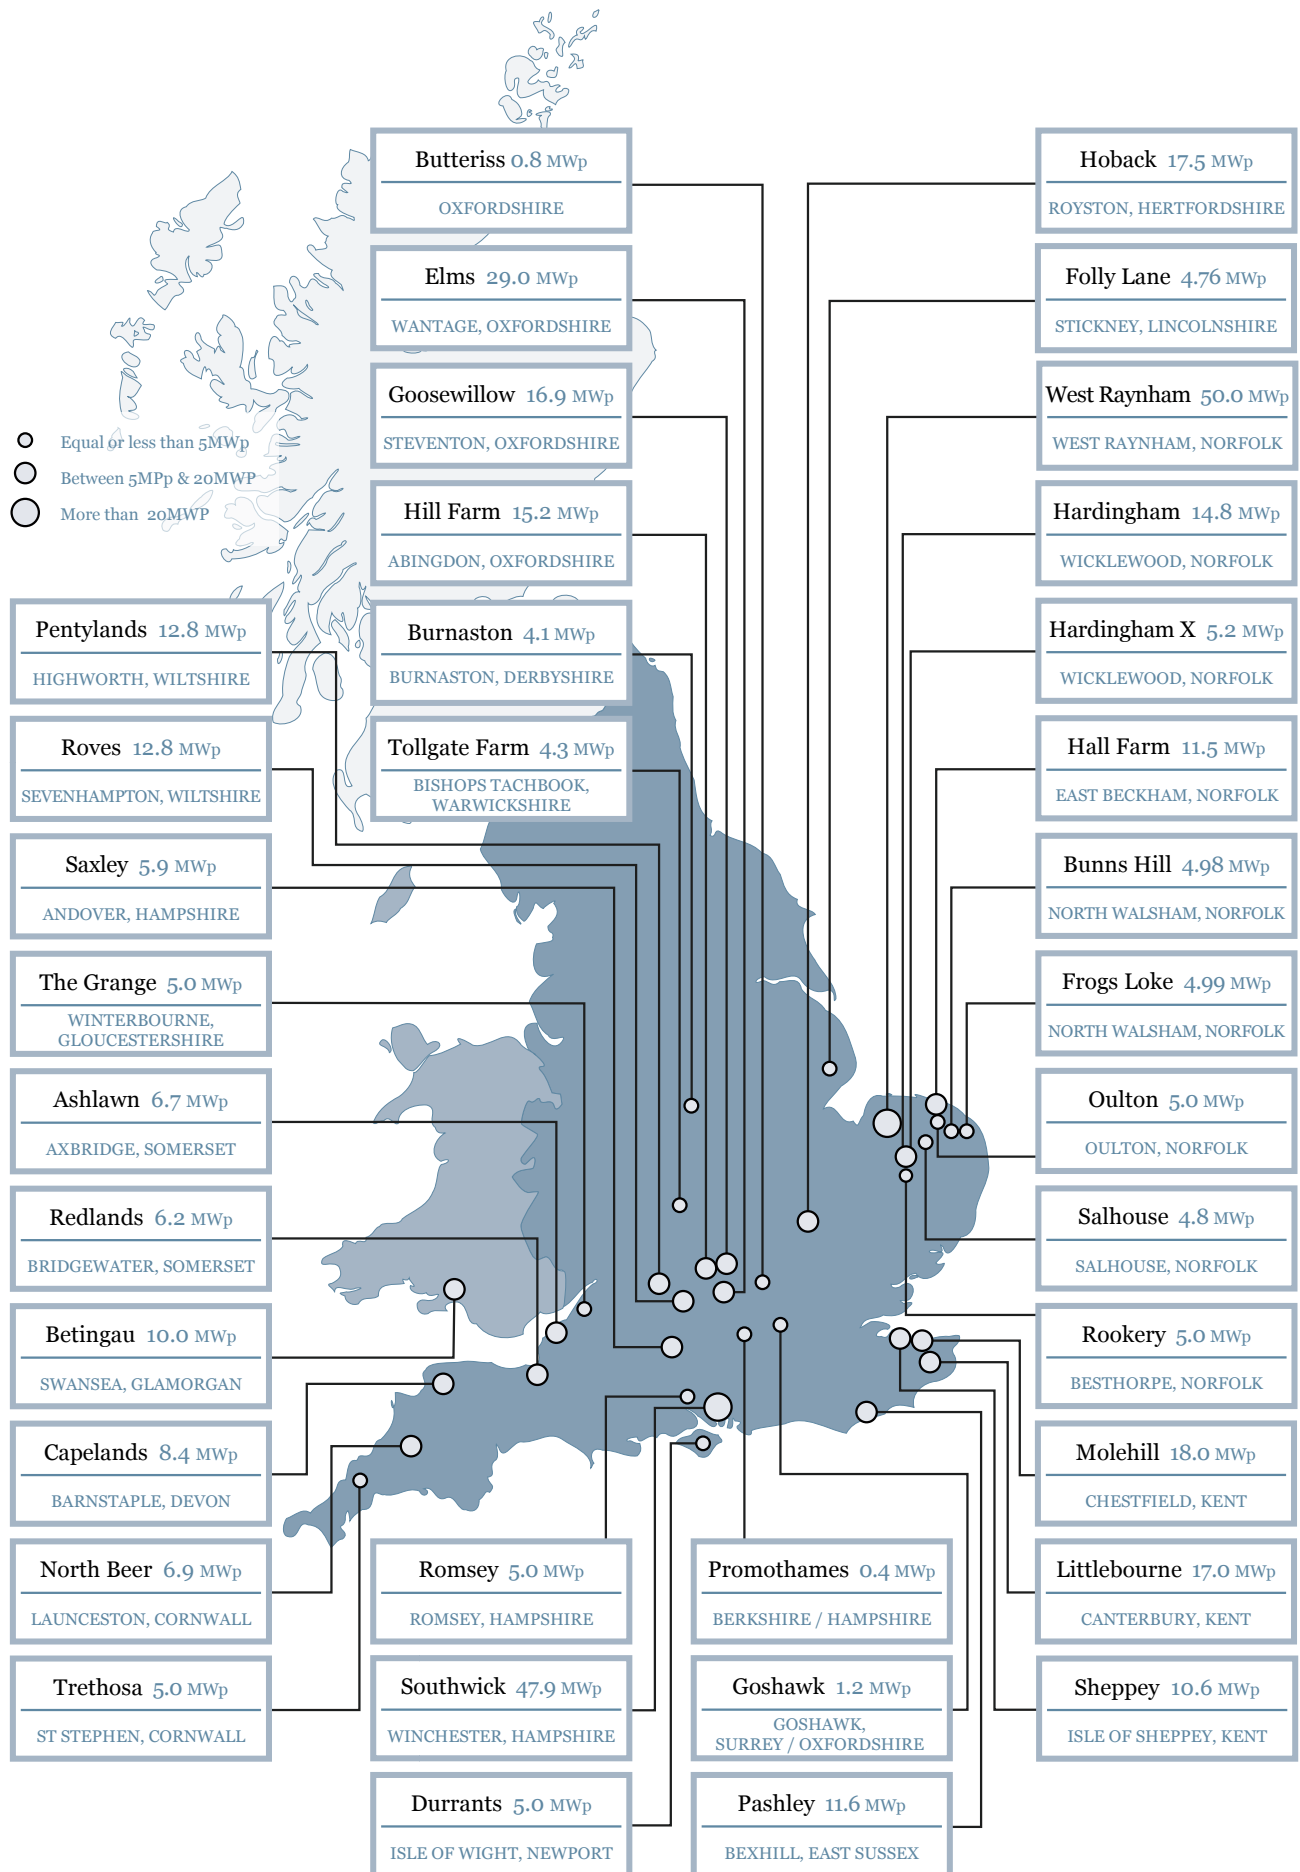

Please see the Company's website for the full investment policy.
