## Bluefield | Solar Income Fund

### INTRODUCTION

Bluefield Solar Income Fund Limited ("BSIF" or the "Company") is a sector specialist infrastructure fund focused on the acquisition and optimisation of UK based solar photovoltaic ("PV") energy assets.

The Company was listed on the LSE on 12 July 2013 and now has a market capitalisation of £524m as at 31 December 2019.

The Board comprises five experienced independent directors (the "Directors", see left), receiving arms-length investment advice from Bluefield Partners LLP ("Bluefield" or the "Investment Adviser", see page 4 for details).

### FINANCIAL AND OPERATIONAL HIGHLIGHTS

As of 31 December 2019, the Company has 87 solar PV projects (46 large-scale sites, 39 micro sites and 2 rooftop site) spread across England and Wales.

The fourth interim dividend of 1.98p per Ordinary Share ("POS") in respect of the FY ending 30 June 2019 was announced on 18 September and paid on 1 November.

In addition to the fourth interim dividend, an additional dividend of 0.63p per Ordinary Share ("POS") was declared on 18 September and paid on 1 November.

The Company's total dividend for the FY ending 30 June 2019 totalled at 8.31p POS compared to a target of 7.68p POS (7.43p POS delivered in FY 2018).

### INVESTMENT OBJECTIVES

The Company seeks to provide shareholders with an attractive return, principally in the form of quarterly income distributions, by investing in a portfolio of large scale UK-based solar energy infrastructure assets.

### COMPANY OUTLOOK

The Company and its Board have set a target to deliver long-term, stable dividends growing in-line with RPI.

The Directors believe that attractively priced acquisitions and strong contractual protections will allow the Company to achieve the target return of 7p POS annually, rising with RPI.

Subject to maintaining prudential level of reserves, the Directors intend to distribute cash generated in order to optimise shareholders' returns and that the Company will achieve its target returns without recourse to reinvestment of spare cash flows.

### INVESTMENT POLICY AND STRATEGY SUMMARY

The Company invests in a diversified portfolio of solar PV energy assets, each located within the UK, with a focus on utility scale assets and portfolios on greenfield, industrial and/or commercial sites. The Company targets long life solar energy infrastructure investments, expected to generate stable renewable energy output over a minimum of 25 year asset life.

No single investment in a solar energy infrastructure asset (excluding any third party funding or debt financing in such asset) will represent, on acquisition, more than 25 per cent. of the prevailing net asset value ("NAV").

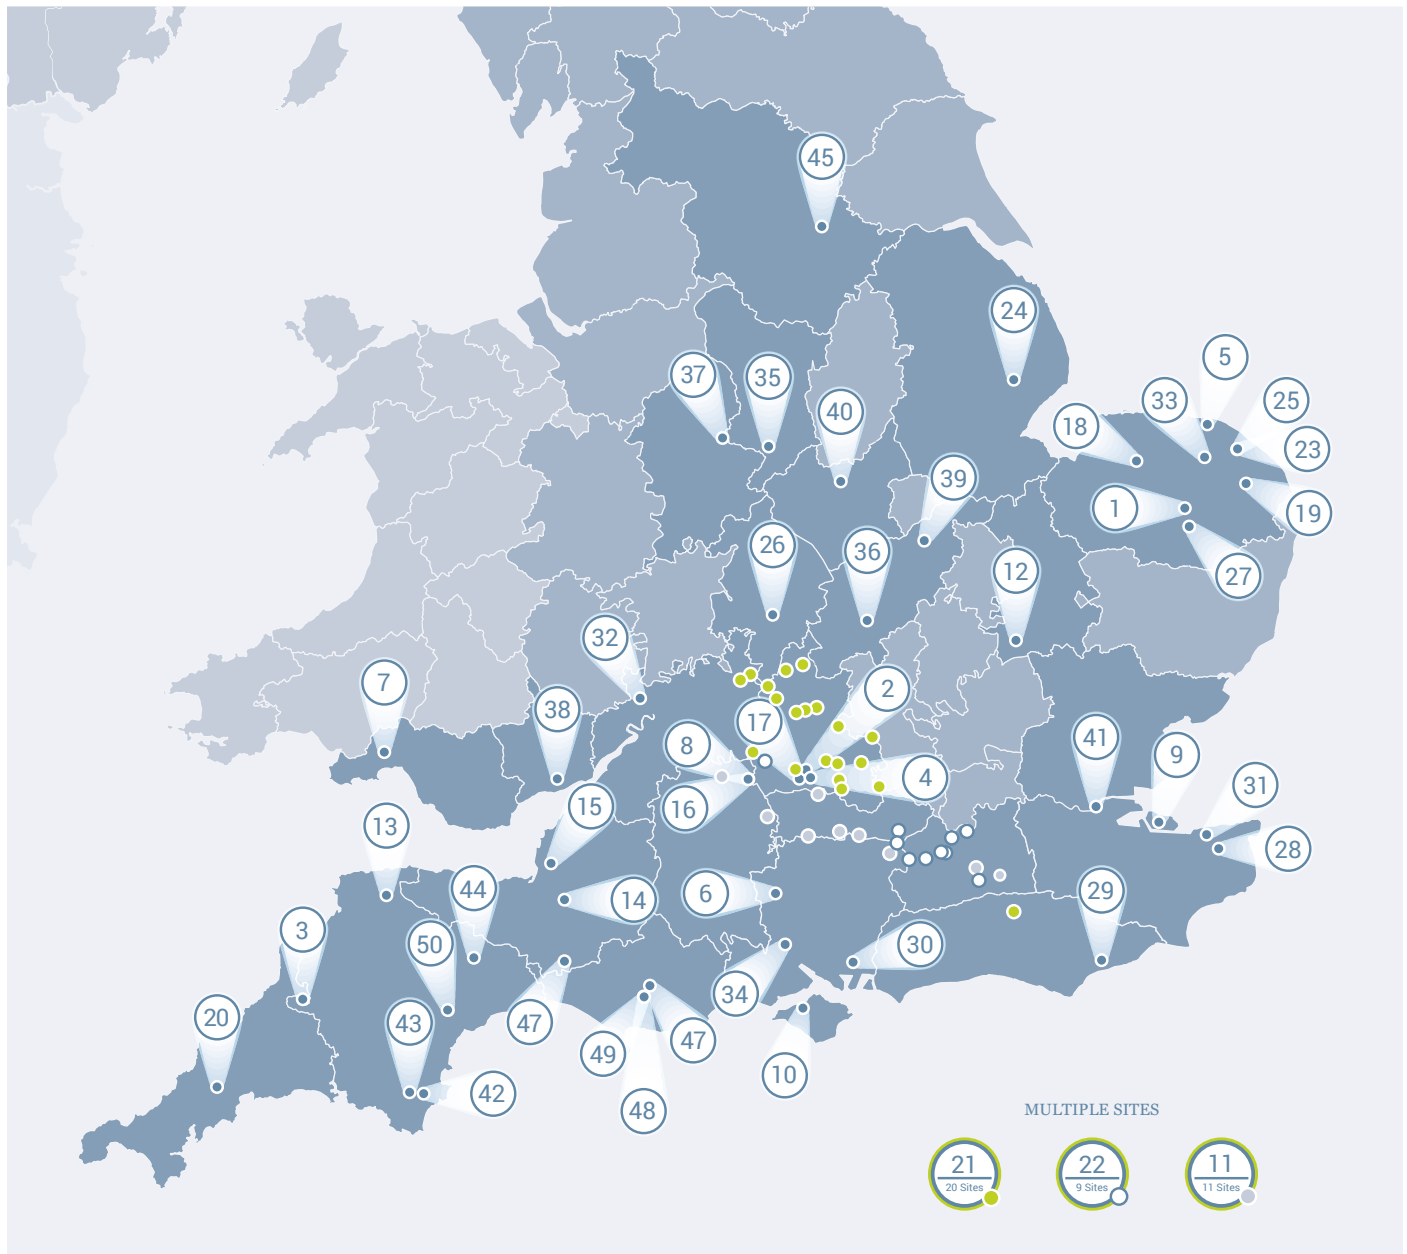

Total non-recourse financing within the portfolio will not exceed 50 per cent. of the prevailing gross asset value ("GAV"). Short term debt to facilitate the acquisition of investments (when taken together with the project finance noted above) will also be limited so as not to exceed 50 per cent. of GAV.

Please see the Company's website for the full investment policy.
